

Lab 3: Traffic Light

Copy file *trafficLight.html* from my *labs* folder on drive *P* to your *labs* folder on drive *P*.
Copy files *button-red.svg*, *button-green.svg*, *button-yellow.svg*, and *circle-black.svg* from my *graphics* folder on drive *P* to your *graphics* folder on drive *P*.

TrafficLight.html will start with all three lights out, and then turn the red light on. It calls a function to turn the green light on after 2 seconds. Complete *trafficLight.html* so that the lights cycle, with 2 seconds for red, 2 seconds for green, and $\frac{1}{2}$ second for yellow.

To receive credit for this lab, you must demonstrate a running program by Thursday, April 14.
